Methods for the Efficient Deployment and Coordination of Swarm Robotic Systems

List of Corrections

Neil Eliot

June 2017

List of Corrections

The following table summarises the corrections proposed to my thesis in response to the examiners and my supervisors suggestions. In this table we adopt the following notations and assumptions:

- ID stands for the number of a proposed correction.
- PJ, KS, NE shown between the two brackets refer to the examiners (Dr Peter Jancovic, Dr Konstantantinos Sirlantzis) who have suggested the corrections, respectively. NE referes to Neil Eliot, the author.
- In the table of each correction, the first row shows a short description of the proposed correction according to the page number of the original thesis; the second row shows the action made for the correction according to the page number of the old thesis.

1.1 General Corrections

ID:(KS)	Short description of a proposed correction.
	Action taken to resolve proposed correction.
1:(KS)	Use of the word chaotic/chaos could be confusing. Renamed initial phase of the swarms development to 'disorganised' throughout.
2:(KS)	Context of chapter 3 could be moved to end of chapter 2 and the data analysis section moved to an appendix. Moved simulation implementation from chapter 3 into Chapter 2. Moved data aggregation component into a new appendix.
3:(PJ & KS)	Several references are showing journal/publication title followed by 'Proceedings of' or 'Transaction on'. All titles need to be made consistent - 6, 7, 9, 10, 11, 12, 14, 15, 16, 18, 20, 24, 25, 28, 33, 37, 41, 47, 50, 52, 54, 55, 56, 58, 59, 61, 65, 67, 69, 71, 74, 76, 77, 78, 79, 82, 86, 90, 93, 94, 96, 98, 100, 113, 118, 126, 127, 130, 137, 139, 140, 141, 142, 146, 147, 150, 151, 152, 154, 155, 156, 157, 158, 161 Bibtex data file updated by restructuring the title text.
4:(KS)	References require publication date - 21, 60, 70, 75, 92, 135 Bibtex data file updated to include publication dates.
5:(KS)	References with no publisher - 27, 30, 36, 49, 60, 101, 108, 115, 132, 148, 149 Bibtex data file updated to include publishers.

6:(KS)	Reference apostrophe missing from name - 115 Bibtex data file updated.
7:(KS)	References with capitalised Author - 88, 149 Bibtex data file updated.
8:(KS)	Reference requiring page numbers - 117 Bibtex data file updated.
9:(PJ)	Citations in sections 2.1 and 2.7 need to be separate out to the relevant authors rather than a single list. References split out from Barnes and Bennet appropriately.
10:(PJ)	Formulae 2.1, 2.3, 2.4 4.2, 4.3, 4.4, 4.6, 4.7, 4.8 - Formula notation for cardinality needs to be reviewed. Cardinality notation changed to use . for magnitude and . for cardinality in both formulae and inline equations e.g. $nbr(b) \stackrel{\triangle}{=} \{b' \in S : bb' <= C_b\}$ $R(b) = \{b' \in S : bb' <= R_b\}$ $v_r(b) = -\frac{1}{ R(b) } \left(\sum_{b' \in R(b)} \left(1 - \frac{ bb' }{R_b} \right) bb' \right)$ $\{o \in O : bo <= O_b\}$
11:(PJ)	Several spelling errors of stabalise. Global replacement to stabilise.
12:(KS)	Several apostrophe errors on swarms Global check and replacement of references to swarm's where appropriate
13:(PJ)	Figs 6.4, 6.28, 6.29 needs to indicate starting point of simulation. Updated graphs by adding "Start Point" and arrows to graphs.

1.2 Specific Corrections

14:(KS)	Page (Abstract) Line 14 - Use of the term nodes needs
	to be made consistent with the rest of the thesis.
	Changed to agents for consistency.
15:(KS)	Page 2 Line 24 - Explain boid-based.
	Paragraph extended to include reference to seminal pa-
	per by Reynolds and comparison added to highlight sim-
	ilarity.

16:(KS)	Page 6 Line 21 - Typo - "fire service [111], as" updated to "fire service [111] as"
17:(KS)	Page 8 Line 30 - typo - anomalies 'healing' updated to "anomalies thus 'healing'"
14:(KS)	Page 9 Line 6 - Reference to Hoff paper requires clarification. extended sentence to include message propagation reduction issue identified by Hoff.
19:(PJ)	Page 12 Line 9 - Description of the coordinates needs to be made clearer - The coordinates of an agent Re-worded section - The position vector is given by the coordinates of an agent Also added back reference to appropriate section.
20:(KS)	Page 14 Line 5- explanation of vectors needs to be added as well as the back reference. paragraph extended to include vector description.
21:(PJ/KS)	Page 13 Line 15 - Typo error - interction interaction
22:(PJ)	Page 17 Line 4 - Reference error - Figure 2.6 shows the Equation 2.5 shows
23:(KS)	Page 24 Line 21 - Referencing error - (Figures 2.10, 2.10, 2.11) (Figures 2.10, 2.11, 2.12)
24:(PJ)	Page 18 Line 12 - Sentence restructure required - moves an obstacles moves it may enter an obstacle's
25:(PJ)	Page 21 Line 17 - Internal reference error. Latex block error corrected - Equation 2.7 becomes Equation 2.8.
26:(PJ)	Page 71 Line 1 - (Static Swarm conclusion) There needs to be a mention of the current work and the usage of the distance metric. Added a discussion of current work (with references).
27:(PJ)	Page 19 Line 13 - Section 2.6 uses unexplained notation. The ^ is explained in section 2.9. Explanation moved back to 2.6 for clarity.
28:(PJ)	Page 22 Line 7 - Section 2.9 uses inline formulae for movement. Equation broken out and referenced. Component parts of the equation discussed.

29:(PJ)	Page 26 - 39 - There needs to be consistency in capital-
	isation of Player/Stage Update all uses to Player/Stage (as used in other papers
	i.e. Player/Stage simulation of olfactory experiments
	and The simulation scenario for swarm robots based on
	open-source software Player/Stage).
	Page 41 Table 4.1 - Explain parameters for <i>Hexagonal</i>
	Swarm
	Modified labels and altered section to highlight that the
30:(KS)	parameters are arbitrary as they are only required to
,	create a swarm to highlight the inter-agent relationships
	that exist. Any parameter combination will work so
	long as the cohesion potential field is greater than the
	repulsion potential field.
91 (DI)	Page 42 - 45 - Table 4.2 - 4.5 Explain Labels Log, Id,
31:(PJ)	N.Id
	Labels expanded in text with descriptions
32:(PJ)	Page 43 Line 6 - Error in text layout (vectorTable 4.4)
	Sentence updated to vector. Table 4.4
33:(PJ)	Page 45 Line 12 - Punctuation error "= 0) The"
	Updated document "= θ). The"
34:(PJ)	Page 46 - Figure 4.7 - Label error.
011(1 0)	Changed labels referring to bot to agent
35:(KS)	Page 48 Line 15 - Typographical error.
33.(IXS)	"described is here." changed to "described here."
36:(PJ)	Page 53 Line 3 - Typo in introduction.
00.(10)	changed "is a swarm." to "in a swarm."
	Page 54 Table 5.1 - Explain parameter requirements
37:(PJ)	Paragraph extended to include an explanation of the
	parameters and the type of swarm they create.
	Page 54 Table 5.1 - Labels in Weight component refer to
	neighbour and agent and should be inline with original
38:(NE)	concepts.
	Altered labels for field potentials to Cohesion field and
	Repulsion field.
39:(PJ)	Page 55 Figure 5.1 - Clarify graph mean
	Paragraph extended to explain the concept in the graph.
40:(PJ)	Page 61 Section 5.3.1 - There needs to be an explanation
	of what a bi-modal distribution presents
	Paragraph extended to explain the neighbour relation-
	ships that create the bi-modal effect when agents have
	extended visibility beyond the first neighbour.

### 41:(PJ) ### 5.21" Page 71 Line 2 - Expand and clarify identical.
